

Machin definitive stamps.

Decimal 1971-1996

These definitive stamps are quite difficult to collect for several reasons. They were produced in many colours, with several combinations of phosphor varieties. Because they have been in circulation since 1971 it is quite difficult to find some of the earlier ones, except from specialist dealers.

This is how I store my definitives Mounted on printed card in A5 clear pockets, and in a sturdy loose leaf file. There are many blank spaces which will take a long time to fill.
